*Awesome Inc*

Hi!

I want to introduce myself as a candidate for the Analyst position. The firms's mission to save the world resonates with me. I am a recent graduate with a major in mathematics, minor in computer science and a motivation to analyze trends in developing economies. Given this background, I am excited to apply to the programmer analyst position to test software, ensure data quality and produce visualizations.

You look for a person with Python programming and report writing skills, I am certainly such a person, and can support the claim with several examples

- I have produced and maintained a large, complex codebase as an intern
- In order to communicate my results, I have produced award winning presentations and reports, which I would be able to provide for Awesome Inc's biennial workshops

I look forward to hearing from you. Please do not hesitate contacting me if you have any questions.

Thanks in advance!

**Orton Babb**
